

PROJECT CASE STUDY

Commercial Retail Epoxy Flooring

GREENCROSS PTY LTD - PETBARN ROBINA, QUEENSLAND

SECTOR	Commercial Retail
SPECIFIER	Unknown
APPLICATOR	Prep & Finish
SYSTEM	Cut & Coat System - Liquathane®
FLOOR AREA	450sqm
DURATION	2 days

THE CHALLENGE

The project required a flooring system that could handle constant foot and paw traffic while maintaining a hygienic, easy to clean surface. With pets and staff moving through the space daily, durability and safety were top priorities. The finish also needed to align with the store's bright and welcoming aesthetic, complementing the brand colours without drawing focus away from the retail environment. The client sought a system that could be applied with minimal odour or disruption to trading hours.

THE SOLUTION

After assessing the project requirements, the chosen system was APC's Liquathane® from the Cut and Coat range.

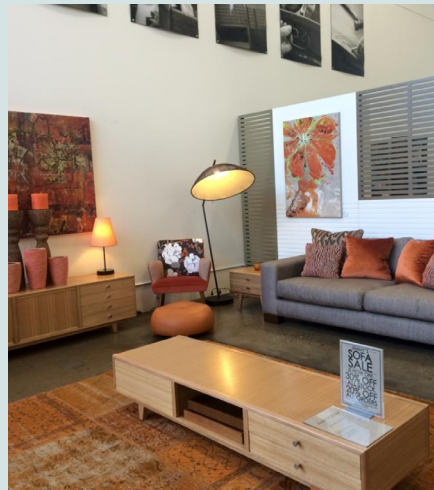

- The existing surface was mechanically prepared to achieve a clean and receptive surface.
- Liquathane®, a 2-pack water based clear urethane, was applied to deliver a semi-gloss, seamless finish.
- Its low odour and solvent-free composition made it ideal for use in an active retail environment.

The system was applied efficiently, ensuring strong adhesion to the concrete and long lasting performance suited to Petbarn's high traffic conditions.

KEY BENEFITS

- ✓ Australian Made and manufactured by All Purpose Coatings
- ✓ APAS (Australian Paint Approval Scheme) Approved
- ✓ High UV resistance and exceptional adhesion
- ✓ Solvent-free and low odour during application
- ✓ Seamless and easy to maintain

MORE PROJECTS

THE RESULT

The finished floor delivers a clean, modern finish that ties in seamlessly with Petbarn's existing fit-out. It provides a durable, low maintenance surface capable of standing up to the daily demands of staff, customers and pets alike - maintaining both function and appearance over time.

This product delivered an exceptional finish. Reliable, consistent and professional from start to finish!

Cameron, Prep and Finish

CUT & COAT PRODUCT SUITE

Liquathane®
Water Based Clear Urethane

APAS Approved, solvent-free system with a semi-gloss finish. Low odour, low VOC.

Liquathane® Matte
Water Based Clear Urethane

APAS Approved, solvent-free system with a matte finish. Low odour, low VOC.

Tetrathane®
Solvent Based Clear Polyurethane

UV Stable and UV Blocking. High gloss, wet-look finish.

Sparta60®
Solvent Based Clear Polyurethane

Exceptional UV resistance and protection properties.

Sparta Guard®
Solvent Based Clear Polyurethane

APAS Approved. Exceptional UV resistance and protection properties.

WHY CHOOSE ALL PURPOSE COATINGS

Quality you can rely on

APC provides an end-to-end solution from specification and onsite technical guidance to national distribution and certified applicators, ensuring consistent results across all commercial projects.
